**Rain water harvesting:** The College has a rain water harvesting system with which rain water is collected and stored. This water is used at times of water scarcity during summer. The roof water is drawn down the PVC pipes fitted and water is collected in huge water absorption pits / concrete ring wells. The water thus collected is enough to satisfy students' rest room needs, gardening and washing purposes. In addition to this, water needed in extra is procured from the bore well of the institution.

**Waste Water Recycling:** Normally ninety percent of the water that is used for campus cleaning, corridor cleaning, washing hands, cleaning the floor, washing utensils etc. is again used for watering the potted plants. Students are strictly informed to wash their utensils and hands at the roots of plants so that it is used by plants.

**Economical usage or reduced wastage;** Though water is available in surplus quantity, students are sensitized regarding water conservation methods and measures that are feasible to the institution. They are advised to use minimum quantity of water for their day to day uses in college.
